SIGNATURE STYLE

While my own personal style is very colorful and eclectic, I am always focused on providing clients with homes that are reflective of their unique, personal tastes. Helping a client to create and implement their vision is the key to any successful project. In addition, a home should be tailored to a client's lifestyle, whether it be the life they are currently living or the life they aspire to – I like to think I help my clients discover themselves through their homes.

NEW YORK: I love the pace and energy of New York and could not imagine living anywhere else. Each neighborhood is so distinct in flavor and vibe, I feel like I am on vacation when I leave the enclave of the Upper East Side and head downtown for an afternoon of strolling, shopping or dining.

NEW YORK REAL ESTATE:

There is such a vast range of styles within such a small amount of space. Viewing Manhattan's buildings from the exterior, you cannot even begin to imagine how varied and different each apartment is from one to the next, from classic to ultra sleek and everything in between.
